Gary, I am gathering all of the docs I have concerning the dive team's support and will forward those soon.

Initially, we had to pay for some of the equipment needed by the dive team. That is not the case now. All you would have to cover is travel and per diem for the dive team members, unless they require otherwise. They could charge those costs to the Site.

The passive samplers, development of FSPs/QAPPs for the collection of the samples, etc were procured under the RACs RI/FS task order under a field change form. The dive team will prepare a dive and safety plan and a final report.

Subject: Passive Sampling

Rafael,

I saw that EA did the QAPP, sample equipment, etc, for Donna for the passive sampling for PCBs with the help of the EPA dive team; we are looking at doing something similar for San Jacinto (for dioxin); so I am looking for some task order SOW language for that. Do you have something for Donna you could send?

Thanks,

Gary Miller
